

# MAGNET ATTACHMENT

An essential attachment where distant retrieval of any magnetic object is necessary - the magnet attachment is tested to pick up objects of up to 20kg and has proved extremely effective in recovering hidden weapons.

## SAVING VALUABLE TIME ON YOUR RESCUES

### HOW TO USE

Developed to pick up objects of up to 20kg in weight. The sleeved fitting is designed to slide over the pole top fitting, which secures it in place using a double sprung button mechanism. Use by extending the pole to the object to grab with the magnet attachment.

### MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting, as damage will prevent the attachment from fitting securely.

### SPECIFICATIONS

|                  |                 |
|------------------|-----------------|
| Material:        | Stainless Steel |
