We Make the Longest, Most Versatile Rescue Pole Systems in the World

Reach and Rescue Pole Kit

KIT INCLUDES

- Pole
- Clamping Float
- Crook
- Body Hook
- Pro Snare
- Flotation Collar
- Pole Bag
- Kit Bag
- Grappler
- Scaff Hook Carrago

HOW TO USE

Attach an attachment by sliding it onto the gold collar. This will secure into place with the spring buttons. Extend the pole to desired length and use.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting as damage will prevent the attachment from fitting securely.

Pole Size & Material	Material	Product Code	Collapses to (m)	Weight (kg)	Float required
5 Metres	Ultra light Carbon Fibre	RRPK5	1.8	2.1	No
9 Metres	Ultra light Carbon Fibre	RRPUPK9	2.1	3.1	Yes
13 Metres	Ultra light Carbon Fibre	RRPUPK13	2.4	4.7	Yes
17 Metres	Ultra light Carbon Fibre	RRPUPK17	2.6	5.2	Yes

- Four extended sizes available
- Precision engineered snap-on head assembly
- Carbon Fibre material
- Strong quick release adjustable clamp
- High visibility end section
- Stored in quick release bag
- Extremely low maintenance
- Buoyancy aid attachment

- Fail safe rope ensures pole remains intact
- One or two person operation
- Smooth action enables fast extension and retraction

We Make the Longest, Most Versatile Rescue Pole Systems in the World

USES AND APPLICATIONS

The Clamping Float is the main flotation device for use with the Reach and Rescue Pole System. Its main function is to support the pole on the surface of the water. The Clamping Float can act as an individual body buoyancy aid.

HOW TO USE

Open the yellow top section of the Reach and Rescue Pole and insert the pole through the blue collar on the end of the float. Turn the yellow locking sleeve anti-clockwise to secure the float in place. To remove, reverse the process.

MAINTENANCE & PRECAUTIONS

Avoid dropping the float onto hard surfaces. Wipe dry after use. Periodically check the thread is clean and grit-free. Clean with warm, soapy water if necessary. Store in Reach and Rescue's Kit Bag. Ensure the locking nut is present on the sleeve.

As these images illustrate, the Reach and Rescue **Clamping Float enables buoyancy** and supports the pole, keeping it above the water surface. It can be used in conjunction with other Reach and Rescue attachments, such as the Flotation Collar.

SPECIFICATIONS

- Material: Plastic coated foam
- Colour: Yellow
- Weight: 850g
- Length: 30cm
- Diameter: 20cm

STOCK CODE RRF

The Clamping Float enables buoyancy and supports the pole, keeping it above water surface.

We Make the Longest, Most Versatile Rescue Pole Systems in the World

USES AND APPLICATIONS

The Crook is a highly durable hooking tool and is designed based on the traditional 'shepherd crook', to enable easy hooking onto the casualty. The design and stainless steel material of this attachment makes it a highly durable hooking tool. It is safe and effective for human, animal and general retrieval.

The sleeved fitting is designed to slide over the pole top fitting, which secures it in place using a double sprung button mechanism. Use by extending the pole to the casualty with or without the clamping float (depending on distance). Once engaged, normal procedure applies.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting, as damage will prevent the attachment from fitting securely.

SPECIFICATIONS

- Material: Stainless Steel
- Weight: 290g
- Length: 32cm
- Width: Opening distance of Crook 12.5cm

STOCK CODE RRCK

We Make the Longest, Most Versatile Rescue Pole Systems in the World

Body Hook

USES AND APPLICATIONS

The Body Hook is used for retrieving both conscious and unconscious bodies and injured persons away from water. The large hook means the casualty is not required to be proactive in their own rescue.

HOW TO USE

Attach the Body Hook by sliding onto the gold collar of the pole. This will secure into place with the spring buttons. Extend the pole to the desired length, hook the Body Hook around the casualty's waist and retrieve.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting, as damage will prevent the attachment from fitting securely.

Not only does the Reach and Rescue Body Hook enable the quick and accurate retrieval of a casualty - it does so without causing collateral injury to them, whether they are conscious or unconscious.

SPECIFICATIONS

- Material: Aluminium
- Weight: 328g
- Length: 500cm
- Width opening: 420cm

STOCK CODE RRBHK

We Make the Longest, Most Versatile Rescue Pole Systems in the World

USES AND APPLICATIONS

This tool is designed to quickly ensnare an inanimate object or when the operator has no co-operation from the target; in animal rescues and retrieval of unconscious persons.

HOW TO USE

This tool attaches to the universal sprung button sleeve. It is a spring loaded design, which needs to be reset after each snaring. The target is placed inside the loop and a light tug on the pole will release the snare, locking onto the target.

MAINTENANCE & PRECAUTIONS

The sleeve and cable should be kept dry, clean and lightly oiled. If the spring of the cable reduces dramatically, please contact the supplier.

Another animal life saved by the RSPCA with assistance of Reach and Rescue equipment

Happy faces in the image above as the team at the RSPCA have rescued another animal using the Reach and Rescue Pole and Pro Snare Attachment. The lamb was located down a crag near Snowdon, and thanks the long reach of our Award Winning Rescue System the endangered animal was rescued successfully. Additionally, the skilled RSPCA team responsible for the rescue were also kept safe from harm due to the Reach and Rescue Pole's providing high operator

safety by keeping rescuers out of hazardous zones. This rescue was carried out using our brilliant attachment - the Pro Snare. The advantage of The Pro Snare is that it is a spring loaded device where the loop is placed over the target (in this case the lamb) and with a light pull on the pole it will release the snare, locking onto the target. This tool is ideal for animal control and even unconscious human retrieval. Reach and Rescue endeavour to supply rescue professionals top of the range lifesaving equipment that will assist rescues in all types of situations, without putting the operators at risk in life threatening hazard zones.

Flotation Collar

USES AND APPLICATIONS

This is a buoyancy aid designed to capture and tighten around a casualty in water. It can also be used to lift a human or animal up to a height, while providing a cushioned hold.

HOW TO USE

The Flotation Collar comes with a sleeved fitting. This is designed to slide over the pole top fitting, which secures it in place using a double sprung button mechanism. A second line can be attached to the main collar metal eye to aid heavy lifting. This device floats to enable ease of reach to the casualty.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be tested regularly on the pole top fitting, as damage will prevent the attachment from fitting securely. The Velcro lasso system should be checked and maintained. Clean regularly to maintain high standards.

SPECIFICATIONS

- Material: Stainless Steel, webbing and foam insert, nylon coating
- Weight: 700g
- Length/Width: Opening Diameter 45cm
- Operating Temperature: -5°C to > 70°C
- Storage Temperature: -45°C to > 70°C
- Dimensions: 188mm (I) x 40mm (w) x 95.5mm (h)

STOCK CODE RRFC

POLE BAG 21

USES & APPLICATIONS

This holds all sizes of poles and closes via velcro flaps.

MAINTENANCE & PRECAUTIONS

Keep clean and grease free. Check the velcro for function.

SPECIFICATIONS

- Material: Nylon
- Colour: Black
- Weight: N/A
- Dimensions: Various sizes to cover each sized pole

"It's a great piece of equipment to have on site, especially considering how far it can reach."

- Port of Poole Marina

The Grappler

USES AND APPLICATIONS

This attachment is particularly useful on irregularly shaped retrievals where maximum engagement is critical. The Grappler has proven extremely effective in the removal of flood debris and in boat line grasping.

HOW TO USE

The sleeved fitting is designed to slide over the pole top fitting, which secures it in place using a double sprung button mechanism. Use by extending the pole to the casualty with or without the clamping float (depending on distance). Once engaged, normal procedure applies.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting, as damage will prevent the attachment from fitting securely.

SPECIFICATIONS

- Material: Stainless Steel
- Weight: 550g
- Hook Radius: 12cm
- Length: 29cm
- Across 2 hooks: 23cm

STOCK CODE RRGP

We Make the Longest, Most Versatile Rescue Pole Systems in the World

USES AND APPLICATIONS

The Carrago attaches a fixed line and Scaff Hook Carabena to a distant eyelet, allowing heavy retrieval. This is a large, lightweight aluminium carabena for longer-diameter anchor points.

HOW TO USE

This tool attaches to the top collar of any Reach and Rescue pole in the same way as all the other fittings and it is used to reach down, across or upwards to any securing point similar to a harness eyelet. A line is initially attached to the sprung carabena, and once the operator has hooked the target eyelet, the pole is then retrieved. The sprung carabena will subsequently lock onto the target eyelet and pull away, leaving a secure line for retrieval of the object or person.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting as damage will prevent the attachment from fitting securely.
